Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Traci C. Curry provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

U.S. Exports Slightly Higher (see p. 2). U.S. agricultural exports rose slightly during the first 7 months of fiscal year 1990, increasing 3 percent to \$25.2 billion. Increased cotton, corn, and vegetable exports offset lower exports of wheat, soybeans, soybean meal, live animals, and dairy products.

Record Imports Expected In Fiscal Year 1990 (see p. 5). Record U.S. agricultural imports of \$22 billion are forecast for FY 1990, \$500 million above the February forecast of \$21.5 billion. The previous record of \$21.5 billion was set in FY 1989. Estimates of record fruit, vegetable, and beef import values, along with a substantial increase in sugar imports, offset projected drops in coffee, cocoa, and rubber. Agricultural imports during the first 7 months of FY 1990 were \$13.5 billion, 6 percent (\$763 million) ahead of last year's record pace.

Billion-Dollar Markets for U.S. Agricultural Exports (see p. 8). Japan was the top market for U.S. agricultural exports during the past 3 fiscal years, followed by South Korea, Canada, the Soviet Union, the Netherlands, Mexico, Taiwan, and West Germany. More than half of U.S. agricultural exports went to these eight countries. Feed grains and products led in export value, followed by soybeans and products, wheat and products, and live animals and meat.

U.S. Exports Slightly Higher

U.S. agricultural exports rose slightly during the first 7 months of FY 1990, increasing 3 percent to \$25.2 billion. Increased cotton, corn, and vegetable exports offset lower exports of wheat, soybeans, soybean meal, live animals, and dairy products.

Corn prices fell, but the volume of U.S. corn exports rose 8 million tons and export value rose \$616 million. Shipments to the Soviet Union rose 2 million tons, and shipments to South Korea, Taiwan, Japan, and Mexico were each more than 1 million tons higher. Shipments to most other customers were higher as well.

U.S. export volume rose largely because of an increased U.S. share of world markets rather than an increase in world demand. World trade was little changed from the year before during this period, but competing exporters had reduced exportable supplies, increased their domestic use, or built stocks. China, Thailand, Argentina, and Canada all relinquished market share to the United States, leaving what was likely the second largest U.S. share of world corn trade ever.

Tight Supplies Sustain Corn, Cotton Prices

While corn prices were lower during the first 7 months of FY 1990, tight supplies and strong demand overseas prevented prices from falling to the levels of 2 years earlier. FY 1990 October-April corn export prices averaged \$112 per ton compared with \$123 per ton during the same period in FY 1989. Two years earlier,

prices averaged only \$87 per ton; that was before the severe U.S. drought of 1988 that substantially accelerated the decline in U.S. and global corn stocks and drove prices higher. Although the U.S. corn crop subsequently recovered, climbing from 151 million tons to 221 million tons in 1989, demand continued to outpace production, which supported prices.

Increasing demand relative to stocks also supported cotton prices during the first 7 months of FY 1990, and, as with corn, the U.S. share of world trade also increased. However, unlike corn, production changed little, and prices rose compared with the two previous years. Export volume rose more than a third, and export value increased 59 percent, a \$670-million gain.

U.S. soybean meal exports fell \$360 million, and soybean exports fell \$222 million during the first 7 months of FY 1990. Soybean meal consumption increased during FY 1990, because of lower world prices, increasing the profitability of crushing soybeans into meal and boosting the volume of U.S. soybean exports. Soybean meal exports fell, however, from 3.6 to 3.0 million tons. The volume of soybean exports rose 2.4 million tons, but prices fell from \$294 per ton to \$226 per ton.

The value of U.S. wheat exports suffered an even larger decline than soybeans, declining \$794 million. Export volume fell from 21.4 million tons to 16.2 million as shipments to China plunged 2.7 million tons, and shipments to South Asia and the Soviet Union together fell 2.6 million tons. (Stephen MacDonald, Commodity and Trade Analysis Branch)

Record Imports Expected in Fiscal Year 1990

Record U.S. agricultural imports of \$22 billion are forecast for FY 1990, \$500 million above the February forecast of \$21.5 billion.¹ The previous record of \$21.5 billion was set in FY 1989. Estimates of record fruit, vegetable, and beef import values, along with a substantial increase in sugar imports, offset projected drops in coffee, cocoa, and rubber.

Agricultural imports during the first 7 months of FY 1990 were \$13.5 billion, 6 percent (\$763 million) ahead of last year's record pace. Imports of noncompetitive commodities were 8 percent below the same period a year ago, and are not expected to rebound. Rubber, coffee, cocoa, and spices showed a combined reduction of \$423 million during October-April. Coffee, rubber, and cocoa import unit values have fallen 37, 29,

and 19 percent, respectively, from year-to-year since October 1989. Coffee import volume proceeded at a record pace in the first half, but that pace is not expected to continue through September. Rubber prices have fallen to their FY 1987 lows without a corresponding increase in volume.

Competitive imports are expected to exceed last year's record of \$15.2 billion by \$1 billion. The freeze this past winter drove up the average import unit values for fresh vegetables by 37 percent through April. Tomato import unit values alone doubled in the first half of FY 1990. As a result, the value of vegetable imports is already 31 percent above a year ago and is projected to level off in the second half for an annual increase of 15 percent. Fruit imports rose 10 percent in the first 7 months and will probably maintain that pace for the entire fiscal year, primarily due to higher orange juice imports (fig. 1).

Beef imports from Australia were stronger than anticipated in the first half. Dry weather there, combined with high prices in the United States and frozen beef

¹ From Outlook for U.S. Agricultural Exports, U.S. Dept. Agr., Econ. Res. Serv., May 30, 1990.

Figure 1
Orange juice imports respond to Florida crop

storage problems in Japan, meant more beef coming to the United States. Beef imports should slow in the second half. Live cattle imports from both Canada and Mexico were high in the first half. Canadian cattle shipments will likely continue high while Mexican shipments typically decline in the second half.

Sugar imports are expected to escalate in the second half to meet the higher import quota for FY 1990. If the import quota is filled through the end of FY 1990, quota deliveries would be 657,000 tons above quota deliveries during FY 1989. (Stephen R. Milmo, Commodity and Trade Analysis Branch)

Billion-Dollar Markets for U.S. Agricultural Exports

Japan bought 21 percent of U.S. agricultural exports in 1989, up from its 20-percent average during 1987-89, making it by far the leading purchaser of U.S. farm exports. Japan's 1989 purchases were more than double the value shipped to the Soviet Union, the second leading importer of U.S. farm products. U.S. exports to Japan exceeded \$250 million in each of the following commodities: live animals and meat, feed grains, soybeans, fruits, cotton, wheat, hides and skins, feeds and fodders, vegetables, and tobacco.

Japan's 1989 purchases of over \$8.1 billion of U.S. agricultural products exceeded its 1988 imports by nearly \$0.8 billion. Japan was either the first- or second-ranked market for each major commodity group (exports totaling \$1 billion or more) except wheat. Japan substantially increased its imports of U.S. peanuts from \$12 million in 1988 to \$22 million in 1989, and live animals and meat from \$1.2 billion to \$1.6 billion. However, Japan's imports of U.S. cotton slipped from \$553 million to \$492 million, and its imports of U.S. hides and skins declined from \$451 million to \$412 million.

The Soviet Union took 8 percent of U.S. exports in 1989, up from an average 6 percent during 1987-89. The Soviet Union advanced from the fifth-ranked market for U.S. agricultural exports in 1988 to second in 1989 by increasing its purchases of U.S. agricultural products by more than \$1.3 billion to \$3.3 billion. The Soviet Union became the top market for U.S. feed grain exports and the second-ranked market for U.S. wheat.

Mexico advanced from sixth place in 1988 to third place in 1989 and remained the top market for U.S. dairy products, fats and oils, and sunflowerseed and oil. U.S. soybeans, feed grains, and live animals and meat constituted over half of U.S. exports to Mexico in 1989 and during 1987-89.

South Korea, the fourth-ranked market for U.S. agricultural exports in 1989, remained the top market for U.S. hides and skins and the second-largest market for U.S. cotton exports. South Korea was also the second largest market for U.S. agricultural exports for the 3-year period and in 1988.

Canada slipped from the fourth largest market for U.S. exports in 1988 to the fifth largest in 1989. However, Canada remained the top market for U.S. vegetable

exports and the second largest market for U.S. fruit and poultry exports.

The Netherlands declined from third place in 1988 to sixth place and ranked third for the 3-year period, but remains an important market for U.S. oilseeds and feed grains. Many of these exports, however, were forwarded to other destinations. The Netherlands was also the leading initial destination for U.S. peanut exports during 1987-89.

Taiwan, a large market for U.S. soybeans, feed grains, hides and skins, and cotton, remained in seventh place in 1989 and for the 3-year period.

China more than doubled its imports of U.S. wheat from 1988 to 1989, becoming the top U.S. wheat market. China also advanced to the third largest market for U.S. cotton in 1989, and placed eighth among markets for U.S. agricultural exports.

Feed Grains and Wheat Lead Commodity Exports

Feed grains, wheat, and soybeans and products formed 50 percent of U.S. agricultural export value during 1987-89 and 51 percent in 1989. Feed grains and products ranked first overall during the past 3 years with 18 percent of U.S. agricultural export value and first in 1989 with 21 percent of the value. Japan, usually the largest market, took more than 25 percent of U.S. feed grain exports during 1987-89. The Soviet Union was the largest market in 1989 and the second largest market during 1987-89 and 1988. Bulgaria advanced to the top 10 U.S. feed grain markets in 1989, rising from 17th place.

Soybeans and products, at 18 percent of total U.S. agricultural export value during 1987-89, ranked second among U.S. commodity exports, but only third in 1989. Japan and the Netherlands (the largest customers) each took around 15 percent of U.S. soybean exports. The Soviet Union was the third-largest market in 1989. Mexico became the fourth largest soybean purchaser in 1989, advancing from sixth in 1988.

Wheat and products ranked third among U.S. commodity exports during 1987-89, but second in 1989, comprising 16 percent of total U.S. agricultural export value. The Soviet Union and China were the top markets for U.S. wheat, taking 14 and 13 percent, respectively, during the 1987-89 period. In 1989, however, China surpassed the Soviet Union. Increased U.S. Government assistance in 1989 helped boost wheat

exports. Around 65 percent of U.S. wheat exports involved the Export Enhancement Program (EEP), Public Law 480, or credit guarantees. EEP assisted about 50 percent of the 1989 wheat shipments.

Live animals and meat (excluding poultry) ranked fourth among commodity exports for 1987-89 and in 1989. Japan took over half the U.S. exports. Mexico and Canada led the other customers with 14 and 6 percent.

Cotton ranked fifth among commodity exports for the 3-year period. Japan and South Korea remained the leading markets for U.S. cotton.

Hides and skins ranked sixth for 1987-89 and seventh in 1989. South Korea bought over one-third of these U.S. exports in 1989, followed by Japan, Taiwan, Mexico, and Canada. Brazil advanced from the 26th largest market in 1988 to ninth.

Fruits and preparations ranked seventh among U.S. commodity exports for 1987-89 and sixth in 1989.

Japan, consistently the major market, took 30 percent of these U.S. exports in 1989, followed by Canada, Hong Kong, Taiwan, and the United Kingdom.

Exports of vegetables and preparations also exceeded \$1 billion, both during 1987-89 and in 1989. Canada was the leading customer in 1989, purchasing 24 percent. Japan has been a consistent runner-up in this market. Mexico rose from sixth in 1988 to fourth in 1989.

Unmanufactured tobacco exports, down slightly in value from 1988, ranked ninth in 1987-89 and 1989. Japan was the major market, followed by West Germany. Italy dropped from the fourth-largest U.S. market in 1988 to 10th in 1989.

Among commodity exports that changed significantly from 1988, peanuts gained 43 percent, rebounding from a 1988 drop. Feed grains, wheat, and rice all gained over 30 percent from 1988. U.S. sunflower-seed and oil exports fell 33 percent. (Cecil W. Davison, Crops Branch)

INDEX OF APPENDIX TABLES

Exports

Table		Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-April 1988/89 and 1989/90, and April 1990	A-4
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-April 1988/89 and 1989/90	A-63
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-April 1988/89 and 1989/90	A-64
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-April 1988/89 and 1989/90	A-65
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-April 1988/89 and 1989/90	A-66

Imports

B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-April 1988/89 and 1989/90, and April 1989 and 1990	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-April 1988/89 and 1989/90, and April 1990	B-4

Prices

C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Reports you can use . . . from ERS

U.S. Agricultural Trade Update gives you up-to-the-minute information.

Each month the *U.S. Agricultural Trade Update* brings you ERS' most up-to-the-minute data on the farm trade sector. This useful 6-page update brings you the most current figures, *delivered by first-class mail to ensure timely delivery.*

The *U.S. Agricultural Trade Update* covers the monthly farm trade balance, U.S. farm imports and exports by quantity and value, and leading exports and exporters.

A 1-year subscription to the *U.S. Agricultural Trade Update* costs just \$15. Or save by ordering a 2-year subscription (that's 24 issues) for \$29, or a 3-year subscription for \$42.

Situation and Outlook Agricultural Trade Reports give you the facts . . . and the forecasts!

These reports provide both current intelligence and historical data on international food and agricultural developments. They also forecast how changes in conditions and policies around the world will affect both U.S. and international agriculture.

Outlook for U.S. Agricultural Exports offers the latest value and volume of U.S. farm exports, by commodity and region, as well as the agricultural trade balance, import commodities, and export outlook. ***World Agriculture*** offers production and use data and analyses by commodity and country, along with a review of recent economic conditions and changes in food and trade policies. ***World Agriculture Regional*** reports summarize the year's developments affecting U.S. agriculture and trade in five key regions, and look to the future with articles on market trends, trade, and policy (regional reports include USSR, China, Western Europe, Pacific Rim, and Developing Economies).

The cost is just \$12 for a 1-year subscription per title. Or save by ordering a 2-year subscription for \$23, or a 3-year subscription for \$33.
